

## WaterJet

We also use WaterJet for large amounts of fast and efficient material removal, in a temperature controlled facility. With a jet pressure reaching 60,000 psi, our advanced CNC waterjet system is equipped with a three axis cutting capacity that can slice through a variety of elements. Our high-end equipment can work with a wide range of materials up to 14 inches in thickness.

WaterJet capabilities include:

<b>Work Center</b>	<b>Cutting area size</b>	<b>Material</b>	<b>Thickness Inch</b>
1 IMS WaterJet 75hp AccuStream Pump	55 x 100	Inconel	6
		Titanium	8
		Steel	6-8
		Aluminum	14
